# Choice Rockplants Rare Alpines 

## Spring 1929

RAINBOW NuRSERY Co., INC. EASt Northport LONG ISLAND, NEW YORK

## TERMS OF BUSINESS and GENERAL SUGGESTIONS.

Correspondence: Every inquiry is given careful attention. We ask to write every inquiry brief and clear.

Orders: Use the order sheets accompanying this catalogue. It greatly facilitates shipment if orders are given early.

Prices: In this catalogue are f.o.b. our Nurseries at East Northport, N. Y. Packing is charged at cost.

Terms: Cash or satisfactory references must accompany all orders, unless the party ordering has established an open account with us.

Our Responsibility: While we pay our particular attention and exercise greatest care to have our plants genuine and true to name or description, we do not give any warranty, expressed or implied, or guarantee them to live and grow or give specific results. In case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not be held responsible for a greater amount than the original price of the goods.

Complaints: All errors and omissions in the execution of the orders will be properly adjusted, if we are notified immediately upon receipt of the goods.

Transportation Rules: All plants ordered are fresh-dug and travel at the purchaser's risk. We do not guarantee safe delivery. Our responsibility ceases when we make delivery to the transportation company or on the purchaser's grounds. Therefore, any claims should be made promptly to the agent at the point of delivery. We ship all plants by express. If shipping by parcel post is required, this must be especially and plainly stated. For parcel post going to all localities west of the Mississippi add $20 \%$ to the amount of the order, or $10 \%$ for parcels going to all localities east of the Mississippi.

Special and Fast Deliveries to Points on Long Island, etc. To all points on Long Island, in New York City, Brooklyn, Bronx, Westchester, Coast of Connecticut (opposite Long Island Sound), we are making Special deliveries with our fast trucks at cost, thus saving our customers extra cost of packing (freight and cartage is eliminated). The plants are delivered in a much better condition than if packed in cases and of paramount importance, the plants are landed on the grounds within a short time after being dug.

## SOMETHING ABOUT ROCK GARDENS AND ROCK PLANTS

Every Garden, no matter how large or small, offers a possibility of a Rock Garden. Whether the site is naturally suitable or "Made to Order," a Rock-Garden is the pet show place of the home grounds and an unforgetable spot most interesting and picturesque. The wide range of color and beautiful forms of the various plants and species offer a real and new picture to study each day of the Year.

It has been and still is our aim, not only to grow and sell the best of the already well known varieties of rockplants but to provide American Gardens with the Uncommon, RARE and New Varieties, sparingly seen and many of them, not yet known in this country.

Our search for the unusual has led us to the furthermost corners of the earth, thus enabling us to gather here in our RAINBOW NURSERIES the most beautiful Gems, these delightful floral children of the mountains.

All these flowers vie with one another for Brilliance of Color and Sheer Beauty.

By Fall, 1929 we will have about 1000 different varieties under cultivation. By then, we believe to maintain the largest collection of Rockplants in the United States.

All our plants are properly labeled and named.
Our SERVICE DEPARTMENT is supervised by experienced men, who are experts on rockplants and in rockgarden construction.

If there is anything we can do to aid people with their problems, such as rearranging their present rockgarden, suggesting further additions, about the correct plants to use, in brief, any or every information desired, concerning Rockplants or Rockgardens, we gladly will give it without any obligation whatsoever.

> A ROCK GARDEN AT HOME SAVES A TRIP IN THE ALPS! WATCH OUR FALL, 1929 PRICE LIST!!!

RAINBOW NURSERY CO., INC.<br>East Northport, N. Y.

## general price list of perennials for The ROCKGARDEN

We have about 800 different varieties of Rockplants under cultivation. All listed varieties without description are ready during the last part of May 1929. Of some varieties we have only a limited stock this Spring.

All varieties marked P.G. are Pot Grown, this enables us to make shipments during the Summer months.
The numbers behind the Genus indicate how many varieties we are growing, besides these listed, and which are ready later.

Plants marked * must be protected during the Winter.
One to Four plants of each variety are sold at the Each rate.
Five to Twenty-four plants of each variety are sold at the Ten rate.
Twenty-four to 250 plants of each variety are sold at the Hundred rate.

SAXIFRAGA, (28) Saxifragaceae. $\quad \begin{array}{r}\text { (Rockfoil) } \\ \text { Saxifragas are well known in }\end{array}$ dens. They are grown on account of their strange beauty and forms. In general the plants like a lime-containing, coarse, gravely soil, and sun.
Many new and extremely scarce varieties are under cultivation in our Nursery.
1380 Crassifolia. (Megasea Group.) Large, shiny, clustered leaves from which rise masses of pink, drooping flowers on nodding stems. 10 ins. April-June.
1381 Decipiens. A splendid plant for the Rockery or for Border edging. The dwarf, mossy plants form dense cushions covered with masses of white flowers on slender, wiry stems. 4-6 ins. May-June.
1390 Hypnoides. Another fine mossy carpeter. Similar to Decipiens with pure white flowers. 6 ins. May-June.
1400 Leucanthemifolia. A scarce Alpine variety for leafy soil and a half shady, moist location. Fine serrated foliage. Many star-like flowers. White. 8 ins. June.

## SHORTIA, Diapensiaceae.

1450 Galacifolia. A charming, galax-like plant for shady places and leafy soil. The dark green, glossy foliage is evergreen. Small white flowers. 6 ins. June.
SCHIEVERECKIA, Cruciferae.
1455 Bornmuelleri. A charming floral gem. It forms neat little silvery-gray rosettes, which are covered with Arabis-like flowers. White. Sun and ordinary soil. 3 ins. April. P.G.
SEDUM, (21) Crassulaceae. (Stone Crop) Sedums are very useful for the Rockgarden or Edging. They are of easiest culture and like sun and ordinary sandy or stony soils. Also good for Wall planting.
All Sedums are sold: 90 cents for $3 ; \$ 2.00$ per $10 ; \$ 15.00$ per 100 ; except where otherwise noted.
1480 Acre. A rapid grower, excellent for carpeting.
The beautiful green mats are hidden by numerous yellow flowers. 2-3 ins. May-June.
1485 Aizoon. Dark green foliage with yellow flower heads. 10 ins. July-August.
1488 Album. Forms neat, dark green mats with
masses of white flower heads on little stems. noted. heads. 10 ins. July August.
$\begin{array}{lll}1.05 & 2.70 & 20.00\end{array}$
$\begin{array}{lll}.90 & 2.40 & 18.00\end{array}$
$\begin{array}{lll}1.05 & 2.70 & 24.00\end{array}$
$\begin{array}{lll}1.50 & 3.50 & 00.00\end{array}$
$\begin{array}{lll}.90 & 2.40 & 18.00\end{array}$
$\begin{array}{lll}1.50 & 4.50 & 00.00\end{array}$

Very choice for planting in walks. 3-4 ins. 310100 June.
Anglicum. (See Hispanicum.)
1498 Dasyphyllum. An interesting low species; the dwarfest of the Family. Forms neat cushions of bluish gray. The little rosettes have pink tips. $1 / 2$-inch.
1505 Ewersi. A trailing variety with fine glaucous foliage. Pink flowers in globose cymes. Very good. 6 ins. July.
1506 Forsterianum. A beautiful species forming compact tufts, with shoots of a distinct blue color. Each shoot forms a terminal rosette. Good for Wall planting.
1510 Hispanicum. (Anglicum or Glaucum.)
A fine plant for Rockwork or for Border edging. The plants form close mats of a bluish color, covered with whitish flowers. 2 ins. May-June.
1512 Kamtschaticum. A somewhat taller-growing kind with dark green foliage. Yellow flowers. 6 ins. Summer.
1515 Kamtschaticum, fol. var. The variegated foliage has shades of green, ivory and pink. 6 ins. P.G.
1520 Lydium. This handsome variety forms dense, deep green mats which turn red in Winter. Fine for Border edging. 3 ins.
1530 Pilosum. A rare and choice species, forming
light green, hairy rosettes which lie close to the ground. Pink flowers. 2 ins. June. 1540 Roseum. Pretty and handsome, with thick, fleshy, emerald-green foliage, shaded beautiful bronze. Golden yellow flowers. 4 ins. July. P.G.
1545 Sarmentosum. Rapid spreaders; useful for covering dry, hot, sandy banks with very poor soil. Also grows good in half shade. 2 ins. Special Prices on large Quantities.
1550 Sexangulare. Another dwarf kind. The dark green leares and the yellow flowers are very showy. 2 ins. June.
1555 Sieboldi. A Japanese species. It has the odd form that is remarkable on all Japanese plants. The fine glaucous foliage is whorly. Rose-pink flower heads. 6 ins. August. P.G.
1560 Stoloniferum. Similar to Sieboldi, but grows somewhat slender.
1561 Spathulifolium. Many neat rosettes of ashesgray color. Choice. 6 ins. P.G.
$\begin{array}{lll}1.20 & 3.50 & 00.00\end{array}$
$\begin{array}{lll}1.05 & 2.70 & 20.00\end{array}$
$\begin{array}{lll}.90 & 2.40 & 18.00\end{array}$ $1.50 \quad 3.50 \quad 00.00$
